ENERGY-TAILORED SOLUTIONS

From raw energy to optimized data strategy.

RiVA | Diskover

High-Computing Platform	***DATA AWARE***	**Comprehensive Data Solution**
World-leading end-to-end storage, GPU compute and workstations for oil & gas.		Metadata indexing from any storage type enables global findability, analysis, organization, and automation.
Optimized for E&P	***APPLICATION AWARE***	**Industry Insights**
Plug-and-play experience for the most demanding oil and gas workflows.		Understanding E&P tools streamlines geoscience data-intensive pipelines efficiently.
World Leading Performance	***VALUE CREATING***	**Optimizes TCO**
Improved overall productivity means faster time to first oil and lowers business risk.		Global data findability and smart management of data estate maximizes efficiency of people and overall resources.

FIRST-OF-ITS-KIND DATA SOLUTION

Ready-to-go solutions for today's biggest energy data challenges.

Diskover and GeoComputing's RiVA system **redefine energy data visibility**, solving long-standing access and management challenges.

Energy sector challenges.		Diskover solutions.
Lack of visibility of unstructured data.	→	Indexes metadata from all storage types, providing a unified, searchable view across global infrastructure.
Difficulties finding, analyzing, and automating energy-specific data.	→	Enables fast search, analysis, and automation of E&P datasets with a rich metadata catalog.
Accumulation of iterations, derivatives, and transient files.	→	Identifies and removes operational clutter, optimizing storage and efficiency.
Legally mandated data inventory and removal.	→	Streamlines compliance by automating inventory tracking and defensible deletion.
Ensuring AI/ML workflows use accurate data.	→	Curates and delivers high-quality, structured datasets for AI/ML training.

FREE	TRY **Community**	To test Diskover and start understanding your data.
ANNUAL PLATFORM FEE	INDEX AND ANALYZE **Essential**	For global findability, analysis, organization, and manual cleanup.
	ENRICH **Professional**	Adds business context to metadata catalog and user-triggered actions.
	ORCHESTRATE **Enterprise**	Sustainable data lifecycle automation through versatile workflows.
	AI, DATA LAKES, LAKEHOUSES **Multistream**	Multistream of organized data for amplified accessibility and insights.
	INDUSTRY ADD-ONS **Energy**	Enables comprehensive analysis and organization of specialized datasets.

Proven solutions for your data, your industry, your goals.

Diskover

diskoverdata.com

High-computing power, data you can see, insights you can trust.

GeoComputing group

geocomputing..net

Diskover Data transforms complex unstructured data into actionable insights with advanced indexing, global search, and analytics, streamlining workflows, automating processes, and optimizing AI and BI pipelines for sustainable data management.

GeoComputing Group LLC created the RiVA geotechnical computing platform and cloud computing services for oil and gas companies. RiVA is the most powerful platform in the E&P industry.

FIRST-OF-ITS-KIND DATA SOLUTION

Ready-to-go solutions for today's biggest energy data challenges.

Diskover and GeoComputing's RiVA system **redefine energy data visibility**, solving long-standing access and management challenges.

Diskover indexes metadata from all storage types, providing a unified view across all unstructured data.

Diskover enables fast search, analysis, and automation of E&P datasets using a rich metadata catalog.

Diskover quickly identifies and removes operational clutter like file iterations and derivatives, freeing tremendous storage space.

Diskover streamlines compliance with legally mandated data removal by automating inventory tracking and defensible deletion.

Diskover curates and delivers high-quality, structured datasets for AI/ML training.
